

# AKLARUS

## SINGLE OR DUAL WAVELENGTH PHOTOTHERAPY SYSTEM

The **AKLARUS** is a powerful single or dual wavelength light/photo therapy device. A choice between one or two wavelengths enables customization of multiple wavelengths in one system.

The Aklarus is a treatment method using specific wavelengths of polychromatic energy produced by super-luminous LEDs to treat a variety of skin and body conditions including acne (see other side for photos) and periorbital wrinkles.

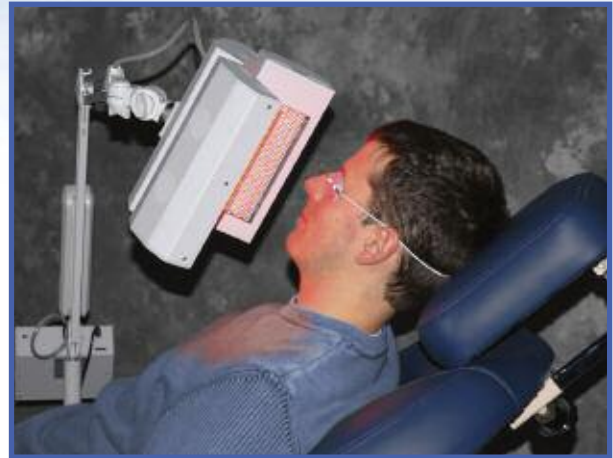

### Price

**\$7500**

Single  
Wavelength

**\$9650**

Dual  
Wavelength

**Choose 1 wavelength or combine  
any of 2 of the following wavelengths:**

Blue 420nm  
10W+/- 3W Total Output  
Standard dose 26J/ cm<sup>2</sup>  
in 20 Minutes

Red 628nm  
20W +/- 3W  
Standard dose 52J/cm<sup>2</sup>  
in 20 Minutes

Infrared 880nm  
16W +/- 3W  
Standard dose 42 J/cm<sup>2</sup>  
in 20 Minutes
