To Whom It May Concern:

I am writing to let you know impressed we are with our HF27 Ultrasound. It has made such a difference at our practice. Recently a patient presented with acute knee trauma. After four consecutive Ultrasound treatments the patient noticed a significant decrease in pain and inflammation. Not only is this product effective, it saves us time as well. The hands-free operation allows us to administer therapy without assistance, which in turn allows us to treat other patients at the same time.

Thanks again for making such a well-thought -out product.

Sincerely,

Paul J. Merlino, DC
