RE: Hands Free Ultrasound

Dear Sirs:

After receiving our HF27 Ultrasound machine, we immediately had positive results. Using this machine gave me the opportunity to administer care to other patients in the rehab facility at the same time that my patient was utilizing the "hands free" ultrasound machine. The long neck sound head is easily maneuvered making it convenient to apply to most areas of the body.

We are quite pleased with this machine, and we are already thinking of getting a second one!

Thank you,

Bruce S. Morrison, D.O. & Staff
