Dear Hill Labs:

I would like to express my satisfaction with the HF - 27 hands free ultrasound unit. It would take too long to explain the number of patients, including myself, that have had fast pain relief with the Hill hands free ultrasound unit.

There are some days when my own discs in my lower back are hurting and usually one treatment with the Hill ultrasound will give me relief.

From herniated and swollen discs, to low back sprain/strain injuries, to general low back muscle pain, the Hill hands free ultrasound has been the best adjunctive procedure that we have discovered in the last 10 years of being in practice.

I highly recommend the HF - 27 hands free ultrasound unit to any doctor who wants to handle the difficult cases of severe low back and pelvic injuries.

Yours in health,

Michael A. Simone, B.A., D.C.
